£ 5,800 +VAT

The flail mower can cut grass up to 130 cm high at work rates reaching 3,600 m² per hour. Supported by pendulum bearings, delivering uniform mulching results by compensating for uneven terrain. Ride up and over obstacles, protecting both the engine and the operator from damage. perforated impact guard provides additional safety.

Cutting height can be adjusted to 6 levels from 10–100 mm, while the operating bar can be conveniently adjusted laterally and in height to match both the operator and the conditions.
